SUMMARY

Architectural Engineer with experience in architectural design, 3D modeling, technical documentation, and sustainable architecture for residential and commercial projects. Proficient in AutoCAD, Revit (BIM), 3ds Max, and V-Ray, with strong capability in producing architectural drawings, visual presentations, and design documentation. Currently pursuing a Master's degree in Sustainable Architecture with a focus on functional and sustainable design solutions.

EXPERIENCE

Sales Supervisor – Building Materials Department

Trade Mentor Company – Al Adawi

2025 – 2026

- Supervised sales operations within the building materials department.
- Coordinated daily sales activities and supported customer requirements related to construction materials.
- Contributed to maintaining workflow efficiency and communication within the sales process.

Architectural Designer

Architectural Engineering Office

April 2024 – February 2025

- Designed residential, commercial, and service facilities with a focus on functionality and sustainability.
- Produced detailed 2D architectural drawings, including plans, sections, and elevations, in addition to 3D architectural models.
- Collaborated with multidisciplinary teams to adapt architectural designs to site conditions and project constraints.
- Applied sustainable design principles and efficient space utilization across projects.

Junior Architect

Urban Design Studio | Homs, Syria

March 2023 – February 2024

- Assisted in conceptual design and development of urban planning and mixed-use development projects.
- Prepared detailed architectural documentation and construction drawings for multiple projects.
- Conducted site analysis and prepared design proposals for client presentations.
- Coordinated with structural engineers and contractors to ensure design feasibility and quality standards.

Freelance Development Trainee

United Nations Development Programme (UNDP)
Professional Training Program

- Completed more than 150 hours of professional training in project management and professional development.

EDUCATION

Master of Sustainable Architecture (In Progress)

Bachelor of Architectural Engineering

Homs University | 2018 – 2023
