 - Worked on diverse architectural projects including residential interiors, facades, and conceptual designs.
 - Provided 2D drafting and 3D modeling services for clients using AutoCAD, SketchUp, and Revit.
 - Delivered high-quality renderings and presentation boards with Lumion and Photoshop.
 - Coordinated with engineers and consultants remotely to finalize design decisions.
 - Managed full project cycle from concept to visual presentation in a freelance capacity.
- 11/2025 – Present
Damascus

3D designer, Alfajer Office furniture
 - Developed innovative furniture concepts based on functional and aesthetic requirements
 - Produced detailed 2D drawings and high-quality 3D models for execution
 - Conducted precise measurements and technical studies to ensure design feasibility
 - Collaborated with execution teams to transform concepts into finished products
 - Delivered complete furniture design solutions remotely, from concept to execution-ready outp

Education

- 2020 – 2025
Damascus, Syria

Bachelor of Architecture,, Arab International University
 - Graduation Project – Aviation Academy
Designed a 40-hectare aviation academy including runway, academic buildings, student dormitories, and an aviation museum. Focused on spatial fluidity, aviation-inspired form, and connection with site context.
 - General Hospital – 300 Beds
Developed a full hospital design including ER, outpatient, inpatient, surgical, and administrative zones. Emphasized patient flow, zoning efficiency, and healthcare design standards.

- Metro Station Design

Planned a functional and accessible metro station with underground circulation, clear zoning for entry/exit, and integration with urban surroundings.

- Urban Planning – Al-Mowasat, Damascus

Proposed a redevelopment masterplan focusing on circulation, zoning, and urban connectivity near key hospital facilities.

Skills

- 1. Architectural Software
Proficiency Skilled in utilizing architectural software for both drafting and modeling, including AutoCAD, Revit, SketchUp, 3ds Max, and Lumion.
- 2. Design Thinking & Spatial Planning
Strong ability to translate conceptual ideas into functional spaces, with a focus on optimizing layouts and circulation.
- 3. Visual Representation & Documentation
Experienced in preparing design presentations that blend clarity and aesthetics.
- 4. Collaboration & Design Communication
Team-oriented with effective communication skills. Able to articulate design intent, receive and apply constructive feedback, and work closely with consultants.
